Mission and Goal of KinderSmile Foundation

Mission: To advocate for an increase in oral care access and oral care education for low-income children in underserved communities.

Goal: The goal of KSF is to help eradicate tooth decay which is the #1 silent epidemic that afflicts economically disadvantaged children in our communities. Our goal is supported by providing age-appropriate oral health education and helping low-income clients with access dental homes to receive preventive, ongoing and comprehensive care.

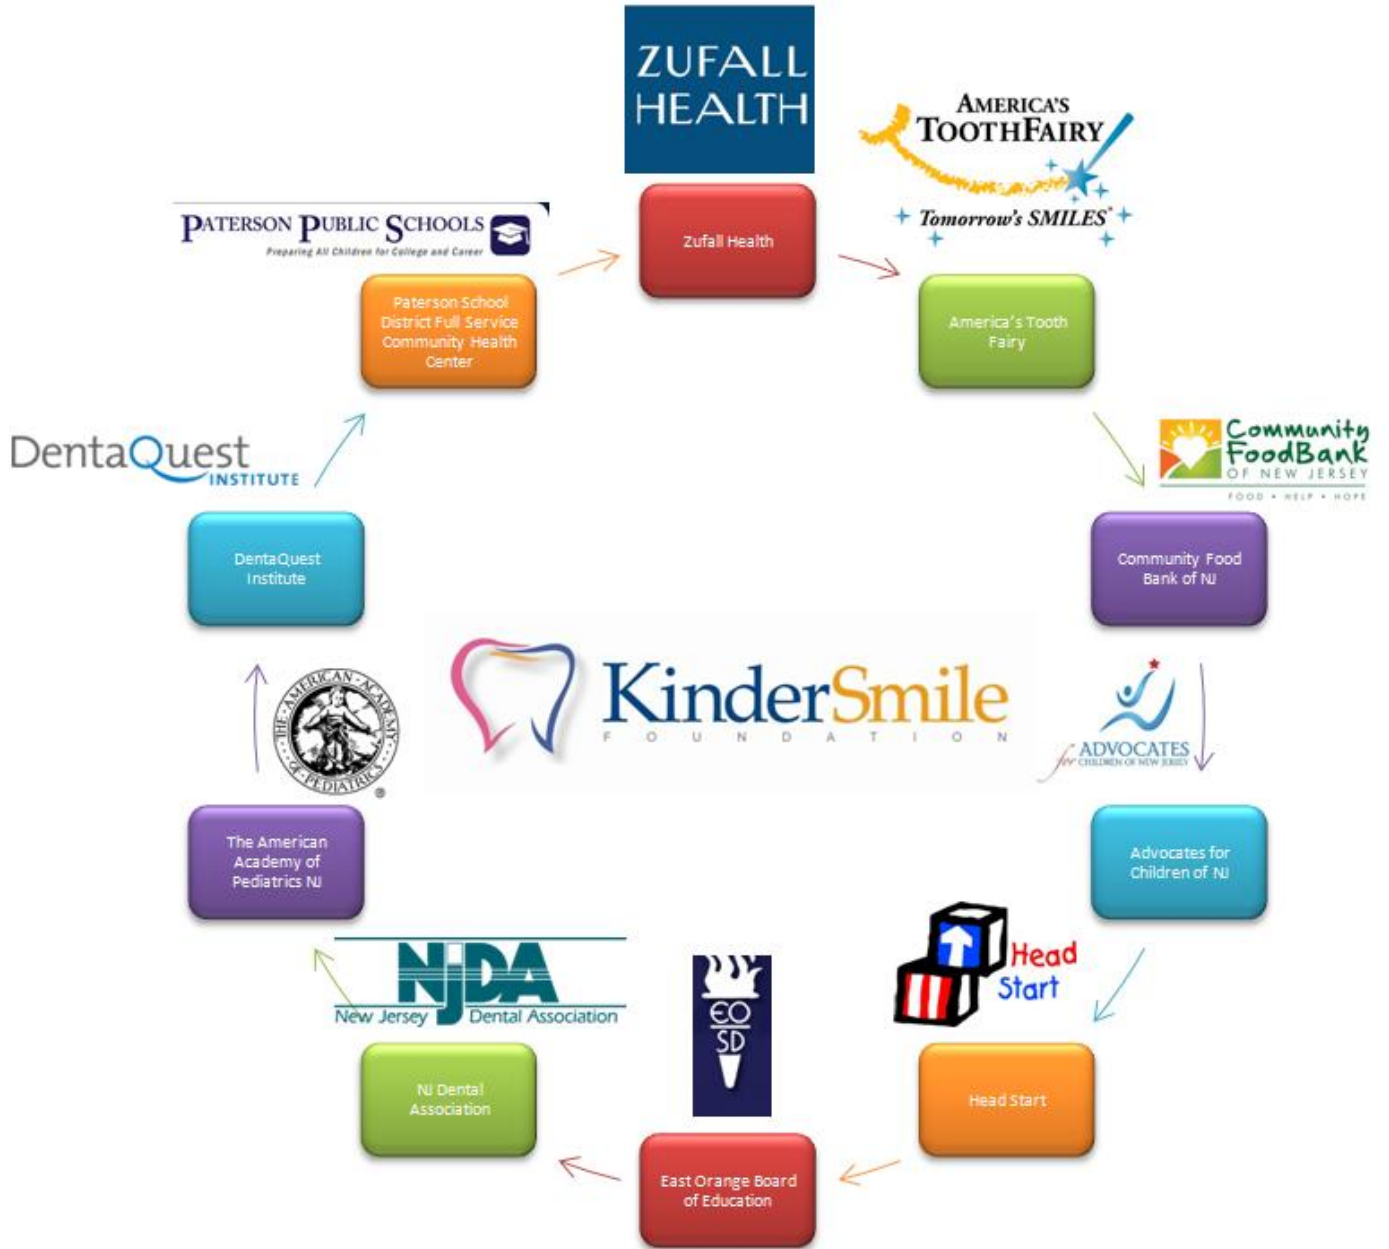

KinderSmile Foundation Staff

- Nicole McGrath, DDS – **President & CEO**
- Sara Kalambur, DDS – **Program Director**
- Ayanna Bradshaw, DDS – **Program Coordinator**

- Target Age 0-12
- Below 200% of FPL
- Pregnant & Postnatal Women
- 17% Uninsured 83% Insured
- 87% Racial & Ethnic Minorities, mostly African American.
- Children in Day Care, Pre-School and Head Start
- Homeless Children
- Children in Paterson, Newark, Montclair, East Orange and Irvington School Districts
- Children with Special Needs

KinderSmile Dental Services

- Children Served – 1,481
- Adults Served – 580
- Examined Children 0 - 3 years of age – 100
- Examined Children ages 3 and older – 755
 - Insured – 86.86%
 - Uninsured – 12.04%
- Volunteered Dentists – 19
 - Dental Students – 14
 - Dental Hygienists – 7
 - Dental Assistants – 4
 - Volunteers – 47
- Jr. Board Outreach Totals – 307 children
 - Peru
 - Nicaragua

The total number of children and adults served includes data from KSOHP, Paterson Schools, Community Food Bank After-School Program, Pre & Postnatal Program, and Junior Board Outreach Trips.

Percentage calculation is based on 548 children, from all the above programs, excluding Junior Board Outreach Trips – 307 Children.

KinderSmile Oral Health Outreach

Program Report: January – December 2014

Total number of children and adults served:	2,061
Total number of children served with age-appropriate Oral Health Education:	1,481
Number of adults received oral health and related nutrition: (parents, teachers/caregivers, nurses, social service/family service staff)	580
Number of children provided with diagnostic/preventive care and triage:	855
Number of children served from birth to three years of age:	100 (18.24%)
<i>Calculation of Percentage was based on 548 children served under KSOHP, Paterson Schools, Community Food Bank After-School Program, Pre & Postnatal Program</i>	

Data gathered on children’s dental insurance based on information provided by parents was verified to the extent possible. Efforts were made to update available information.

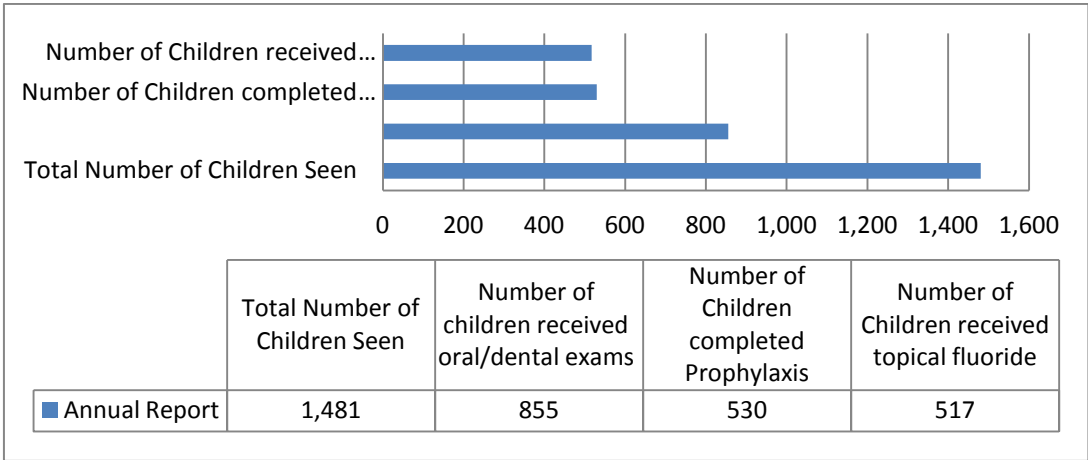

Medicaid/Managed Care	Uninsured	Private Insurance
434 (79%)	66 (12%)	42 (7.6%)

Number Of Children Received Diagnostic / Preventive Care & Triage.

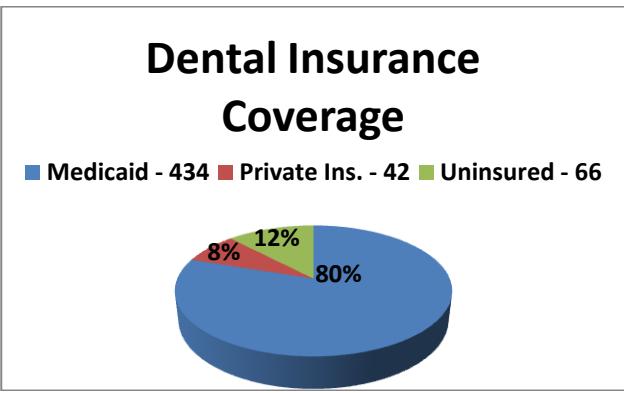

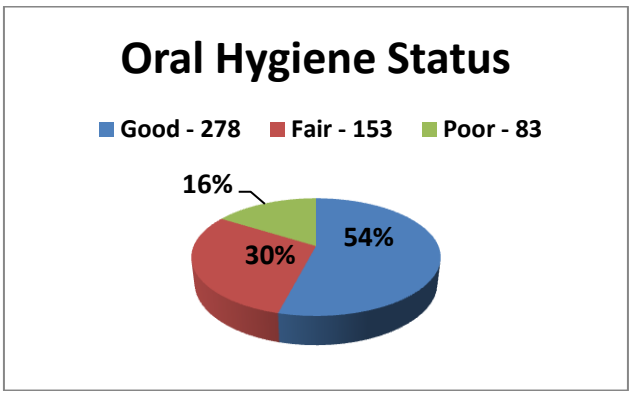

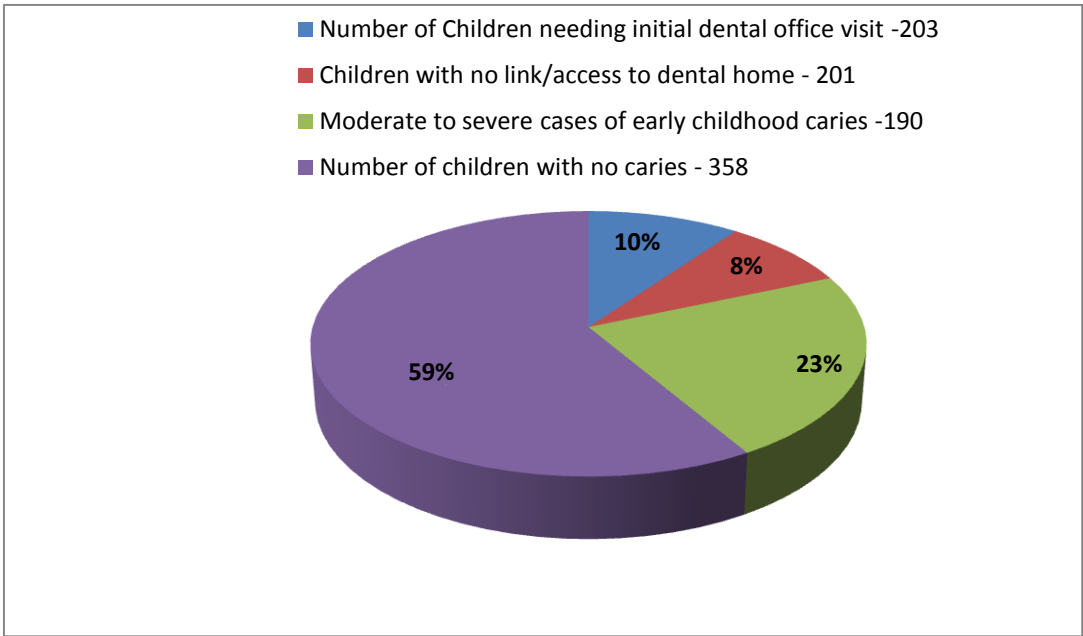

Prophylaxis: (Teeth cleaning)		530 (96.72%)	
Oral Hygiene Index: Plaque Control	Good: 278 (50.73%)	Fair: 153 (27.93%)	Poor: 83 (15.15%)
Number of children received topical fluoride varnish:	490 (89.42%)	Fluoride Gel: 27 (5%)	
Number of children needing initial dental office visit:			203 (37%)
Children with no current link/access to dental home:			201 (36.7%)

Caries Risk Assessment / Triage Based On the Severity of Caries Presence:

Number of children with no visible caries:	358 (65.33%)
Presence early childhood caries moderate to severe lesions:	190 (34.7%)
Total numbers of referrals for follow up included children and pre-postnatal women to link with dental home and/or with presence of visible caries:	281 (51.3%)

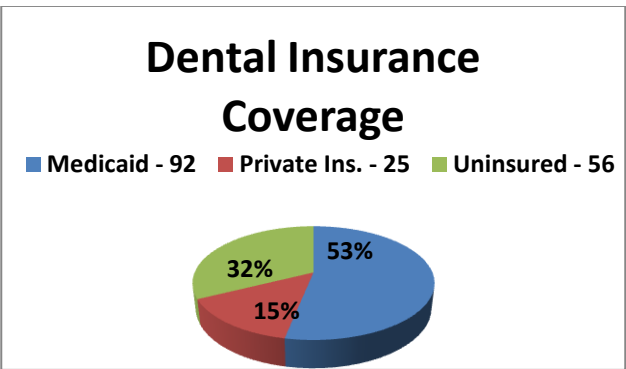

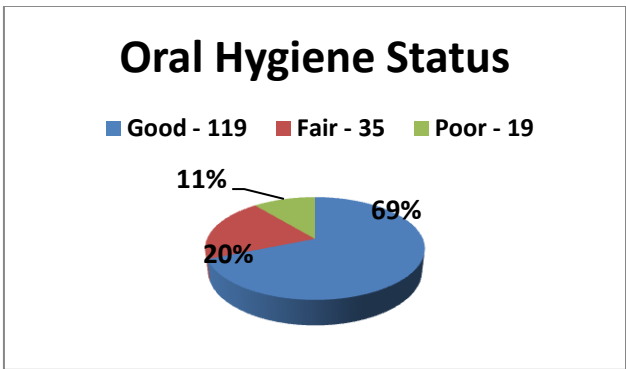

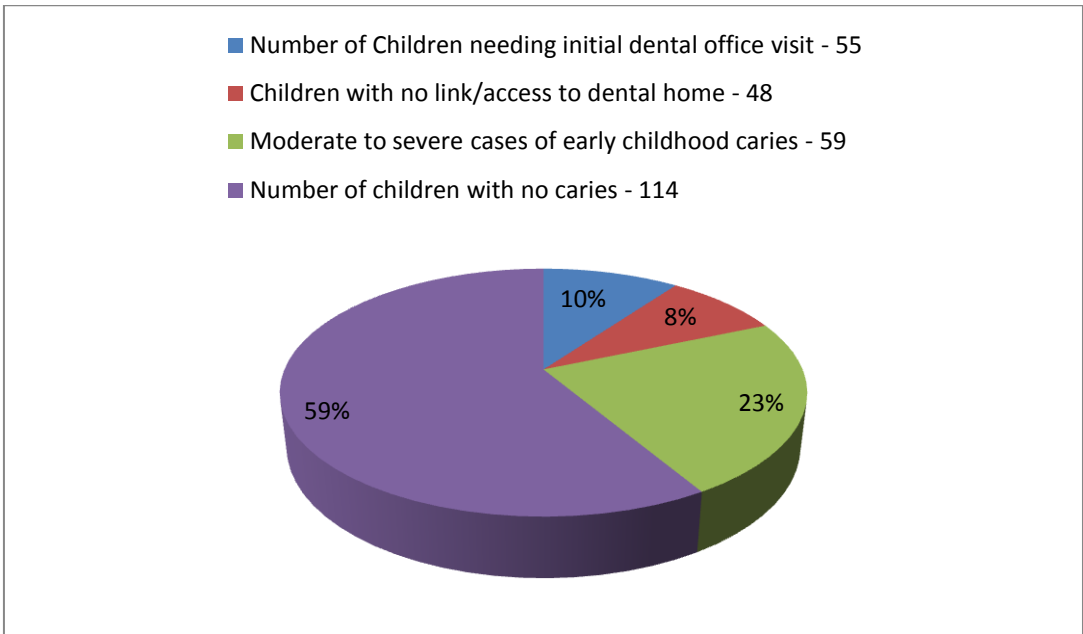

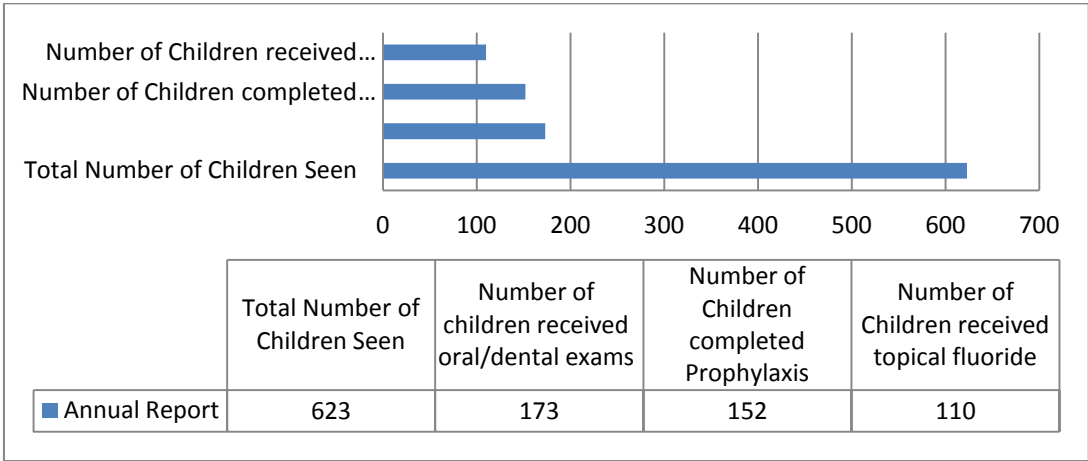

Percentage calculation for the following pie charts are based on 548 children served through KSOHP, Paterson Schools, Community Food Bank After-School Program, and Pre & Postnatal program.

*Calculation of percentage was based on 60 children examined. Data gathered on children's dental insurance was based on information provided by parents.

Prenatal-Postnatal Program

KinderSmile Foundation's Prenatal/Postnatal Oral Health Program (PPN) extended its services to pregnant women and new mothers from a disadvantaged economic background (i.e. the mothers qualified to participate in Women, Infants, and Children Nutritional Program). WIC parents had no dental insurance or limited access to care. KSF's PPN services included dental examinations, dental prophylaxes, and oral health education. The oral health education component focused on the impact of maternal health on the developing fetus; caries disease transmission from caregivers to infants / toddlers; effects of early childhood caries; improper use of bottle and sippy cup; developmentally and age-appropriate daily oral care for infants and toddlers; initial dental visit by age one; benefits of fluoride; and the importance of good nutrition and routine dental care by a professional licensed dental team. KSF staff members helped guide mothers to link with a dental home to access recommended care including specialty dental care, and assistance with enrollment under NJ Family Care / ACA. It is hoped that when a mother has good oral health, her child does as well. This transfer of knowledge and skills will help reduce the incidence of oral disease in children and families.

KinderSmile Team made site visits to provide diagnostic / preventive care / triage along with oral health education to the following programs serving pregnant & postnatal women, and their infant / toddler children. They were East Orange Child Development Corporation serving both center-based and home-based clients; Montclair Child Development Center in Montclair & Orange. In a new collaboration with New Jersey Academy of Pediatrics, KinderSmile conducted an oral health workshop for 15 pregnant / postpartum women at the Newark Renaissance House.

In 2014, a total of 59 pre-postnatal women participated along with 36 infants / toddlers. Out of the 41 clients who were triaged 35 were covered under Medicaid and 6 had no dental insurance. The majority of the women had no link to a current dental home. KinderSmile Team provided resources / referral to dental homes and for enrollment in Affordable Health Care.

KinderSmile hosted our 7th successful annual Give Kids a Smile Day (GKAS) Oral Health Fair on Friday, February 7, 2014. It was held at The Central Presbyterian Church, 46 Park Street, Montclair, NJ. The Fair provided free dental care, diagnostic and preventive oral health education for low-income and uninsured children ages 12 years and younger, including toddlers and infants. Although the weather was frigid and icy, over 234 participants from 7 local day care centers, preschools, Head Start programs and many walk-ins attended. The event included oral health education, nutritional counseling, arts and crafts, live entertainment and free lunch. This year was a collaborated effort with Jr. Board members, dental health professionals, grantors and colleagues, accomplishing a major goal: prevention, treatment and establishing a dental home for our high-risk children. Our dedicated donors, Delta Dental volunteers, and our Partners for Health Foundation grant helped us exceed our expectations. Together, we made a difference in the lives of many of these children.

We want to express our gratitude to a number of guests who donated their time and effort to add to the success of this year's event. Dr. Rene Johe, President of NJ Association of Orthodontists provided literature on 'free orthodontic services' to children from the Interfaith Hospitality Network of Essex County. Dr. Renee Baskerville, Fourth Ward Councilor, spoke to the children about preventing tooth decay, and handed out dental care items. Entertainment was provided by master storyteller, Shirley Johnson, who captured the audience's attention with stories of the African diaspora, and our Tooth Fairy, Arleen Coyle, and her therapeutic dogs. Arts & crafts and lunch was supplied by Links, Inc. representatives, Tammye Jones, Diane Bundy, Pamela Brodie, Bobbie Polk, Gabrielle Smith and Sunne-Ryse Smith. Affordable Care Act representatives were present to answer any questions about the

new health care law.

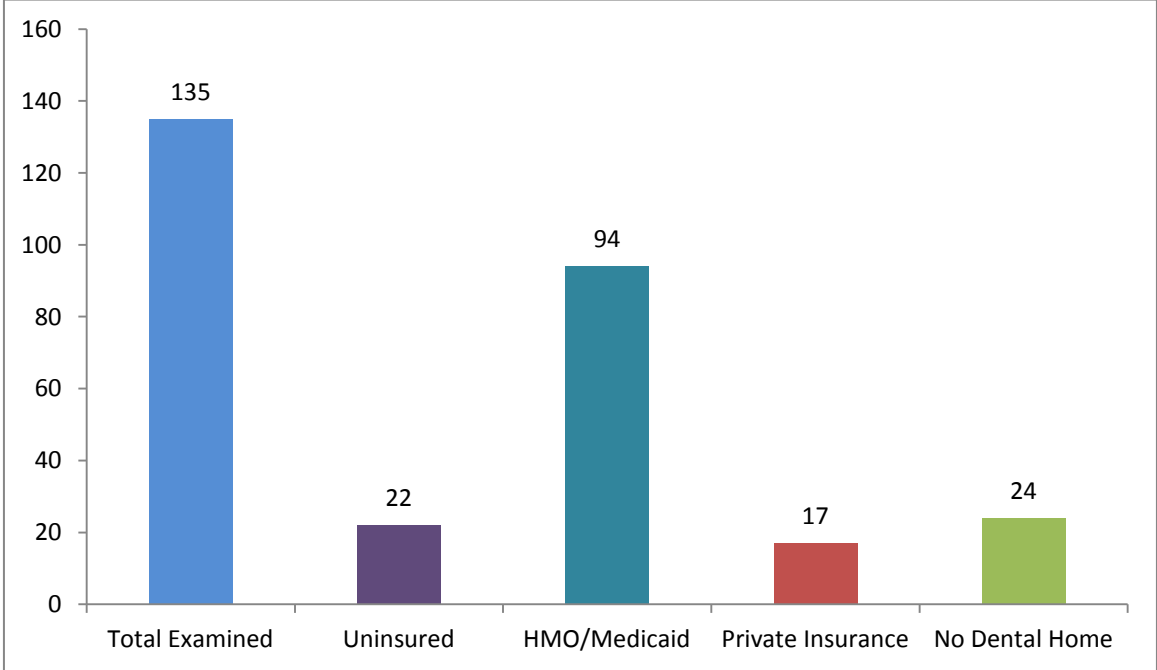

KinderSmile continued their GKAS efforts providing children preventive dental health care and treatment throughout dental health month. The KinderSmile volunteer staff visited 173 Pre-K/ Kindergarten children at Wahlstrom Academy, East Orange, NJ on February 11, and 211 Head Start children at the Montclair Child Development Center, Orange, NJ on February 25, 2014. GKAS outreach served 618 children in February 2014.

Community Service Learning Program

5th Annual International Outreach Trips

Community Service Learning Program (CSLP) offers mentoring and guidance to high school / college students to acquire leadership skills, and to share the Mission and Goals of KinderSmile Foundation with communities in our areas, well as abroad, in under-developed countries. Students are enrolled as Junior Board Members of KinderSmile Foundation and serve as ambassadors doing oral health community outreach. As Junior Board Members they become aware of the lack of access to oral health among at-risk children and families and the impact on their overall health. Members of CSLP, accompanied by an all-volunteer dental team, made Oral Health Outreach trips to Nicaragua and Peru to provide much needed oral health care for children in the remote rural areas.

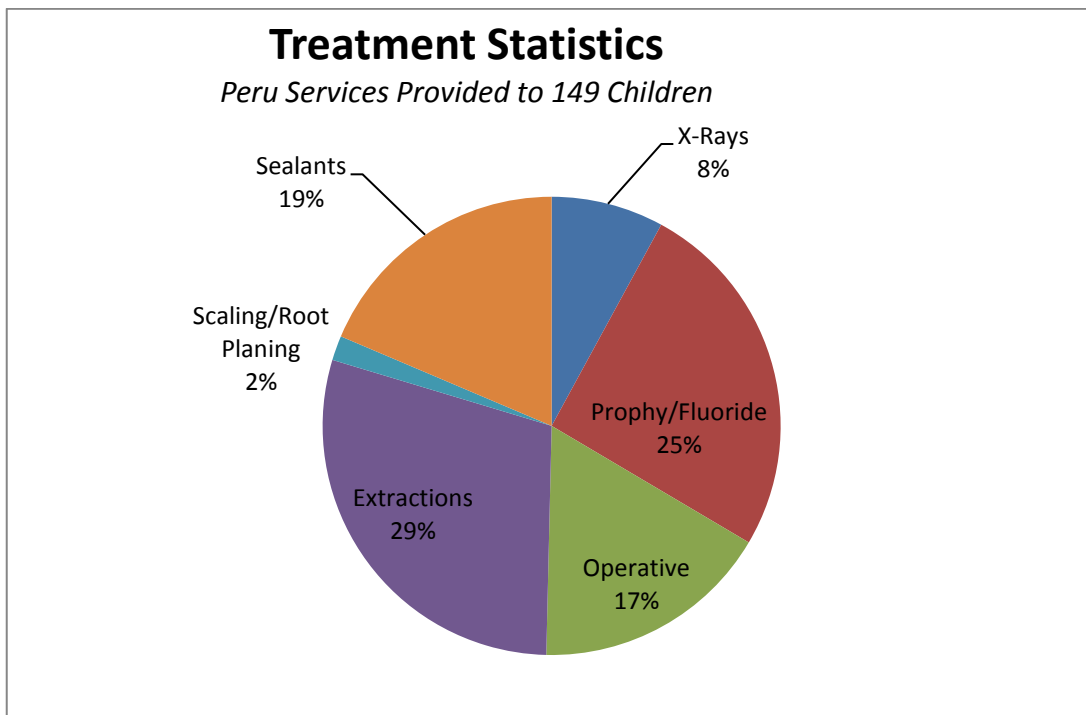

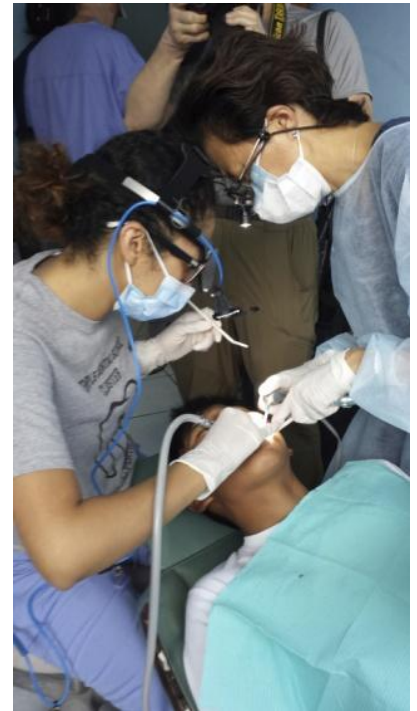

Nicaragua

A total of 21 volunteers participated on the 5th International Outreach trip to Nicaragua. “Free” dental services were provided to 167 Orphans of Children of Destiny Children’s Home. Services were provided by our all-volunteer dental team included the following members; Drs. Nicole McGrath, Founder & President, KinderSmile Foundation, Robert Grunstein from Smile Central Dental, Paterson, Kyung Ha, from Millburn, Pooja Khurana, of Today’s Dental Care in East Orange, Vanessa Duprey, Certified Dental Assistant at the Newark Community Health Center, 5 Rutgers Dental Students and 11 Jr. Board Members. Total In-Kind services provided were \$94,118.

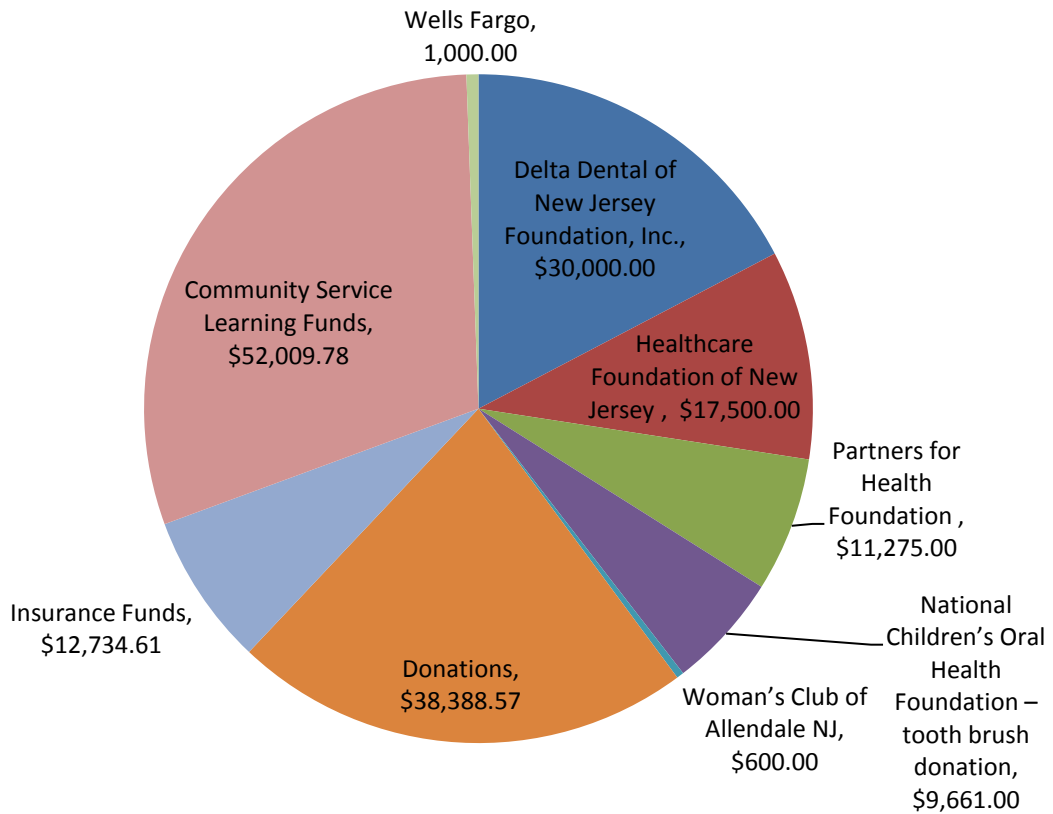

Peru

A total of 23 volunteers participated in a collaborative trip to Lima, Peru. KinderSmile collaborated with Temple University dentists and students to assist in providing “Free” dental services to 149 orphans at I’MME Orphanage. Participants included; Drs. Robert Levine, Periodontist, Shari Levine, Pediatric Dentist, Nicole McGrath, Robert Grunstein, Kyung Ha, Hygienist, Nicole Mosca RDH, 8 Temple University students and 9 Jr. Board members. Total In-Kind services provided were \$178,175.

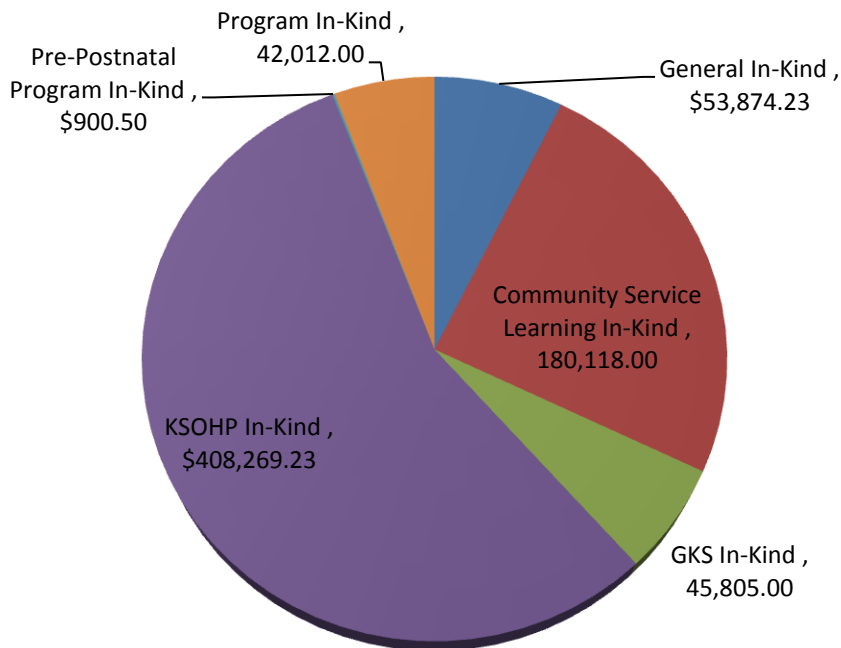

Grantors & Donors
